Courses and Certifications

Java – Udemy
By completing this Java Course, I acquired a strong understanding of Java programming principles and gained hands-on experience in developing applications using Java.

Web Development – Udemy
This course equipped me with the necessary skills like html, css and javascript to create dynamic and engaging web pages and projects.

PROJECTS

To-do List
A to-do list using local storage is a simple application or feature that allows users to create, manage, and store their tasks or items on their device without the need for an internet connection or server-side storage. The application uses the browser's local storage mechanism to save the task data locally.

Snake Game
The Snake Game project implemented using HTML, CSS, and JavaScript is a classic arcade game where the player controls a snake that grows in length as it consumes food.

Interests
Software Development
